MATCHPOINT DECLARER PLAY DISCUSSION

At matchpoints, your goal is to get a higher score than the field. When you see Dummy, ask yourself, "What is the field contract?"

You and Partner have arrived at the normal contract

- A "normal" contract is one most of the field will reach.
- Your goal is to do the same or better than the field.
- Take risks which offer over 50% chance of success. If a contract-risking finesse is likely to produce an overtrick, take it. If a contract-risking line-of-play is likely to produce an overtrick, do it.
- Board 1 and Board 2 are examples of normal contracts.

You have steered into a supernormal (high scoring) contract

- A "supernormal" contract is better than most of the field will reach.
- A close (not so obvious) slam is an example of a supernormal contract.
- Play to protect your good score by playing to make take no needless risk.

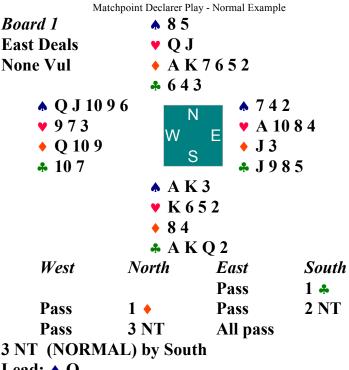

Your Partner has steered you into a subnormal (low-scoring) contract

- A "subnormal" contract is worse than most of the field will reach.
- Ask yourself:
 - "How will the field play the normal contract?"
 - "What will the field result be?"
 - "How can I beat the field result?"
- Play to take an extra trick to beat the normal contract take a chance. Example: Take a low percentage finesse that the field will eschew.
- If you play the hand as the field does, you will receive few matchpoints. If the field plays RHO for a Queen, you play LHO for the Queen. If the field establishes suit "A", you establish suit "B".
- You have little to lose if your risky play fails.
- Board 3 and Board 4 are examples of subnormal contracts.

MATCHPOINT DECLARER PLAY DEALS

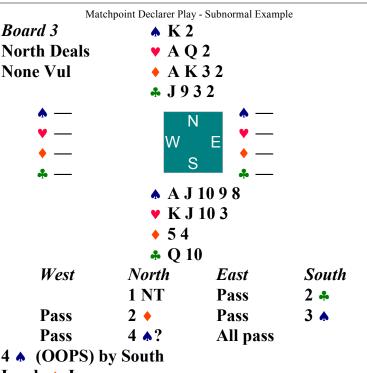

Build, bid, and make a lead for practice deals 101 - 104. Dummy validates the contract and opening lead. Accept any uncommon bidding imposed upon you. Declarer plays the deal, applying matchpoint thinking. Read commentary after play is completed.

If you have time, you may play deals 1 and 2.

Lead: \land Q

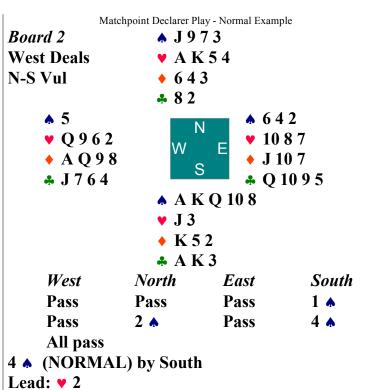

Declarer has seven top winners in this normal 3NT contract. To guarantee nine-trick contract: Promote two v tricks. Easy. But to try for 10 tricks: Win the 2nd ♠ trick, then duck a ♦. If ♦ suit divides 3-2, Declarer has 10 tricks (at least). But, if the suit divides 4-1 (28%), a third A will remove Declarer's last stopper. Then, if defender with long ▲s has the ♥Ace entry, 3NT will fail. Cruel. Extra-time bonus: How might Declarer get 11 tricks?

Lead: J

Is your contract normal? No. What will the field result be? In the field 3NT, Declarer will play & King, & finesse. If the ▲Queen (doubleton or tripleton) is in the East, 11 tricks for +460. If the \triangle Queen is in West, 10 tricks for +430.

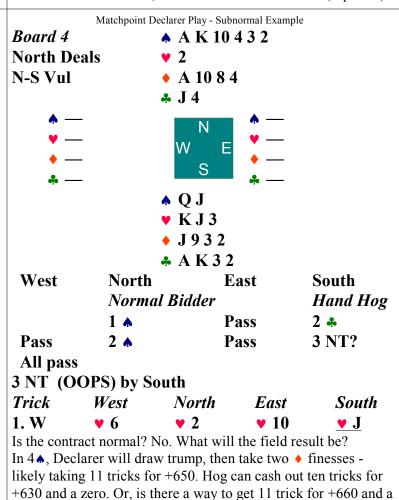

If you play the \bigstar suit normally, you will get get +450 or +420. Realize that if you take the same number of tricks, you will get a *zero*. So you had best play the A suit *ab*normally! Run the Jack

Made 6 — NS +680 (top score)

Declarer has ten easy winners in this normal 4 contract. Is the **v** finesse a good idea? What could happen if it fails?

Extra-time bonus: Suppose South wins T1 with the VJack, trumps a third-round *****, then plays plays trumps. If he believes that West has the • Ace, how can he make 12 tricks? (Squeeze)

top? Hog has nothing to lose by trying - he needs to beat +650.
